PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building high-performance web applications, responsive real-time platforms, and RESTful architectures. Proven track record engineering end-to-end applications including real-time communication systems (Wecho) and task monetization platforms (EarnRewards). Strong focus on clean code, modern frontend frameworks (React), scalable backend APIs (Node.js/Express), and cloud database synchronization (Firebase/Firestore).

TECHNICAL SKILLS

Frontend Development

React.js, JavaScript (ES6+), HTML5, CSS3/Sass, Responsive Web Design, Tailwind CSS, Component Architecture

Backend & APIs

Node.js, Express.js, RESTful APIs, JSON, Authentication Pipelines, Serverless Functions

Cloud & Databases

Firebase (Auth, Firestore, Cloud Storage), MongoDB, SQLite, Web Sockets, Real-Time Sync

Tools & Workflow

Git, GitHub, Vite, npm, Postman, VS Code, CI/CD Deployment (Vercel, Netlify)

PROJECTS & SOFTWARE ENGINEERING

Wecho – Real-Time Chat & Community Web Application

Full Stack Project

React.js, Firebase Auth, Cloud Firestore, Cloud Storage

- Engineered an instant multi-user messaging platform featuring real-time chat sync, active status indicators, and responsive mobile-first UI.
- Integrated Cloud Firestore snapshot listeners and atomic batch operations for instantaneous message updates with zero latency.
- Built secure authentication workflows (email/password verification) and photo media upload pipelines with Firebase Cloud Storage.
- Structured modular React state architecture, achieving sub-second interactive page load times.

React | Firebase Firestore | Cloud Storage | JavaScript ES6

EarnRewards – Digital Tasks & Offers Monetization Platform

Full Stack Project

JavaScript, Node.js, Express.js, REST API Architecture

- Developed a responsive web platform enabling users to complete sponsor activities, earn reward balances, and convert points to payouts.
- Designed backend Node.js and Express RESTful API endpoints handling account authentication, point accounting ledgers, and payout transactions.
- Engineered intuitive user dashboard interfaces with transaction history, live task tracking, and withdrawal requests.

Node.js | Express | RESTful API | Mobile-First UI

Code_Mi – Developer Portfolio & System Showcase

Personal Portfolio

HTML5, CSS3, JavaScript ES6+, Asynchronous APIs

- Crafted a responsive developer website with custom glassmorphism design, adaptive dark/light themes, and animated scroll interactions.
- Connected asynchronous AJAX email delivery endpoints, mobile sidebar navigation, and interactive WhatsApp chat integrations.

HTML5/CSS3 | JavaScript ES6+ | UI/UX Design

EDUCATION

University of Nigeria Nsukka (UNN)

Nsukka, Enugu, Nigeria • In View

Bachelor of Science (B.Sc.) in Computer Science / Engineering
